

PROFESSIONAL BIOGRAPHY

Dusty a consultant with the [Green infrastructure consultancy \(GIC\)](#), working in London, UK and Europe. He is the current President of the [European Federation of Green Roof Associations \(EFB\)](#) and founder of [Livingroofs.org](#), and a board member of [GRO](#) - the UK green roof trade body.

Though he has a particular interest in biodiversity and urban nature, his work in the built environment also focuses on climate resilience and the promotion of greener cities through multi-functional green infrastructure.

In 2021 he was appointed [Industry Expert-in-Residence](#) at the Bartlett School of Architecture, UCL.

A recognised designer, technical and policy advisor on green roofs and urban green infrastructure (GI), he has worked on GI Projects in the UK for the last 25 years and recently worked on the Greening Riyadh project. He is currently working on a number of design projects to deliver wetland green roofs and is part of the team working on Blue roof guidance for CIRIA. One of the founders of [WorldGreenRoofDay](#), he acts as the public face of the event.

He also co-wrote the online small-scale green roof guide, with John Little www.greenrooftraining.com

He is also a published author and has been instrumental in writing strategic reports on green roofs and green infrastructure, the most recent of which is the new [London green roof report](#).

Dusty has also been a TV presenter and is a recognised speaker at conferences and events around the world.
